Maths

Next week we will practice counting to 20 and beyond. We will also recap counting items we can and can't see and the last number being our stopping number. We will think of different strategies to help count larger amounts.

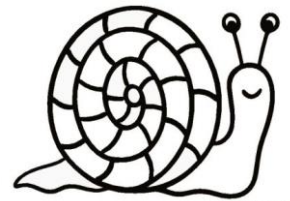

Understanding of the World

We will be learning about slugs, snails and spiders next week. We will explore some of the differences between slugs and snails.

Expressive Arts & Design

The children will have the opportunity to access topic related activities on the craft shelf.

Why do ladybirds have spots?

Personal, Social and Emotional development

We are looking forward to welcoming the grownups to our End of Topic celebration on Wednesday at 2:45pm.

Montessori

The Decimal system is used as an introduction to Place value. The golden bead material is composed of beads that are uniform in size and colour, with only their quantity changing. Children gain an understanding of place value through sight, touch and weight.

Physical Development

Next week we are beginning to practice a carousel of activities for our sports day.
