Healthier Packed Lunches for Children

What you need to know:

Eating well is important. Children need to eat well as it will give them energy and nutrients to grow and develop, be healthy and active.

A healthy, enjoyable lunch gives children the energy they need to learn and play at school.

This leaflet provides information on how to pack a healthier lunch. Please support the school's food policy by following these guidelines.

Practical Tips for a Healthy Lunchbox

- Try to vary the contents of the lunchbox daily. That way you can ensure your child is getting the variety of nutrients their bodies need to function and grow.
- Involve your child in preparing their lunchbox. They are more likely to enjoy the food they have made themselves.
- Wash your hands before handling food. Wash fruit and vegetables before use and put food in clean containers.
- To keep food fresh, make sure it is stored properly: lunches packed the night before need to be stored in the fridge. If using rice, make sure it is cooled quickly and stored in the fridge overnight. To keep your lunch fresh during the day, use a cool bag and put in a frozen drink or reusable ice pack. If your child refuses to eat brown bread, try a lighter variety or make sandwiches using a slice of white and a slice of wholemeal bread. For variety, use pitta strips, crackers, bread sticks, or fruit and vegetable finger foods with a dip.
- Always try to add a little salad to a sandwich. To avoid soggy sandwiches, dry the salad before adding it to the sandwich or put it in a separate sandwich bag or tub.
- Make a lower-fat salad dressing by mixing it with some low-fat yogurt or semi-skimmed milk.
- Make a salad using rice, potato, or pasta from the night before, mixed with vegetables, beans, and so on.

What is a healthy packed lunch?

A healthy packed lunch is a balanced meal providing a variety of nutrients, to be found in four food groups:

Starchy Foods

- Base each meal on a starchy food, such as bread, potato, rice, pasta, and yam. Starchy foods give energy, fibre, vitamins and minerals. Bread, try different types, such as pitta bread, wraps or bread rolls.
- Other starchy foods, such as pasta or rice. Whole grain varieties are best for fibre, which is vital for a healthy digestive system.

Meat and Alternatives

- Add some protein, for example meat, fish, eggs, beans or pulses. Protein foods build muscles and provide minerals.
- Lean meats, such as chicken, turkey or ham. Include oily fish, such as fresh tuna or salmon at least once every three weeks.
- Egg, such as quiche or omelette.
- Meat alternatives, such as quorn or tofu. Dishes containing pulses, beans or meat, for example humus, bean salad or falafel. Meat products such as sausage rolls, sausages and chipolatas, pies and pastries, fried foods should not be included more than once a fortnight.
- Use butter, margarine, mayonnaise or salad dressings sparingly, because these can be high in fat, or use lower fat alternatives.
- The school has a no nuts policy as some children are allergic to these.

Milk and Dairy Foods

Include a dairy product or dairy alternative, such as cheese or yoghurt. These foods provide calcium necessary for strong bones and teeth, as well as providing protein and vitamins.

- Lower fat varieties are healthier.

Fruit and Vegetables

- Don't forget to include fruit and vegetables. You can use fresh, frozen, tinned or dried. Fruit and vegetables are full of vitamins, minerals and fibre necessary for the body to function properly and to keep you strong and healthy.
- Add tomato, lettuce or beetroot to a sandwich. A vegetable dish, such as salad or roast vegetables.
- Fresh fruit, such as apple, banana or pear.
- Dried fruit, such as raisins, apricots or figs.
- Fruit salad (fresh or tinned in juice) or vegetable salad.
- Finger foods, such as cherry tomatoes, cucumber sticks or celery. Good with a dip, such as humus or guacamole.
- Use fresh fruit and vegetables, which are in season to help the environment and enjoy variety!
- Aim to include at least one portion of fruit and one portion of vegetable or salad.

Drinks

Drinks, especially water, help children to concentrate and feel well. Water is freely available in school. Only water or pure fruit juice should be included in the lunchbox

Snacks and Confectionery

Snack foods may be included occasionally but aim to make healthier choices. Snack foods tend to be high in fat, sugar and salt. Foods high in fat can cause excessive weight and may lead to heart disease. High sugar foods are high in calories and bad for teeth. High salt foods may increase blood pressure, which can lead to heart disease and some cancers.

For a healthier snack:

- Replace sweets and chocolate with dried fruit, a small bunch of grapes or fruit salad.
- Replace cakes and pastries with fruit bread or malt loaf.
- Replace salted savoury snacks with rice cakes or breadsticks.
- Please only put one if at all of the following into pack lunches: cakes and pastries, chocolate, biscuits or fizzy drinks in packed lunches.
